or NUTR 2280	Community Health and Nutrition Programs	
3000 level or above Elective in HLED, MGT, or NUTR		2
Total Hours		38

Meeting the above major requirements also satisfies the following General Education requirements: Global, Sustainability, Engaged Learning, two NUTR Writing Intensive courses, and Computational, Mathematical and Analytical (QCM). Note that a cumulative Benedictine University GPA of 2.5/4.0 is required for the off-campus practicum NUTR 4297 Quantity Foods Practicum.

Students pursuing this major will need to complete general electives to fulfill the University requirement for 120 credit hours toward graduation. A student pursuing a major in Food and Nutrition can also earn a major in Health Education and Promotion. Or, students are encouraged to complete a minor, such as a minor in Nutrition and Food Sciences and Community Nutrition and Wellness. Examples of other complementary minors include Entrepreneurship, Management and Organizational Behavior, Marketing, and Sports Management. Students who pursue a

business minor or double major are encouraged to explore the "4+1" affiliation with graduate business programs at the University.

A student earning a B.A. in Food and Nutrition Management can also complete the requirements to earn a minor in Nutrition and Food Sciences.

Food Management Certification Information

The Food and Nutrition Management major is designed to prepare students for positions such as managing a regional or national restaurant chain or franchise or overseeing contract food service operations at sports and entertainment complexes, school campuses, and institutional facilities. Students interested in pursuing the external certifications of Certified Dietary Manager should consult with his or her advisor regarding choice of major electives. After gaining experience in the foodservice industry or specifically school foodservice, program graduates have the opportunity to become certified as Foodservice Management Professionals or School Nutrition Specialists, respectively.

Objectives

Upon completion of the major in Food and Nutrition Management, the student will successfully:

Student Learning Outcome 1: Demonstrate knowledge and application of nutrition science.

Student Learning Outcome 2: Apply sanitation and safety regulations.

Student Learning Outcome 3: Apply principles of food services, food science and techniques of food preparation and modification.

Student Learning Outcome 4: Demonstrate knowledge and strategic application of principles of management theories and systems.

Student Learning Outcome 5: Describe a sustainable food system and the interrelationships with public health, nutrition, the environment, equity, and society.

Student Learning Outcome 6: Demonstrate professional communication and education skills.

Student Learning Outcome 7: Develop critical thinking skills
